YOU MUST SHOW HOW YOU SOLVED EACH PROBLEM – *No Calculators*

1. Jason bought 5 packs of gum at Walgreens for $6.25. His brother, Amos, wanted to buy only 1 pack of gum. How much money will Amos need to buy only 1 pack of gum? *(Draw a picture or show how you found out how much each pack cost)*

2. Write the decimal number 0.87 as a **fraction** and in **word form**: *(show all work)*

3. Find the difference: 3.2 – 1.75 (*show your work to find the difference)*

4. Model $\frac{14}{4}$. Rewrite it as a mixed number or whole number. *(Model and show how you found the mixed or whole number)*

5. Jesse had a babysitting business. She charges $2.50 per hour. How much money will she earn if she babysits for 8 hours? *(Draw a picture or show how you found the amount of money she earned)*
